What is Diamond Dermabrasion?

Diamond Dermabrasion treatment uses sterile diamond heads to abrade and rub off the top skin layer of dead skin cells and at the same time polishes the skin. This immediately restores a smoother and younger looking skin.

Also improves specific skin conditions, including skin tone and texture resulting in a smoother appearance of their skin.

- Rejuvenation of sun damaged skin - face, neck, shoulders, back, arms and legs
- Reduction of age (liver) spots.
- Minimization of blotchy skin coloring.
Reduction of acne and superficial scars from past injury.
- Reduction of oily skin.
- Skin pigmentation mark reduction
- Stretch mark minimization
- Hard to reduce lip area and character lines
- Reduces large pores

Diamond Dermabrasion

Diamond dermabrasion treatments use diamond tip technology to smooth away fine lines, refine pore size and minimize skin imperfections. Dead and damaged skin cells are removed to stimulate a rejuvenating response from the skin's deeper layers.

For normal skin a course of between 4-6 treatments is highly recommended for clients seeking the best results to address skin aging and resurfacing.

For problematic skin conditions and acne scars, stretch marks or scar tissue from past injury; a course of between 6-12 treatments are recommended for a variety specific skin conditions
